Dental plans

If you are enrolled in a dental plan, your dental plan will ask you to choose a dentist from their list of providers. Each family member may choose a different dentist. Your dentist will provide and coordinate your dental services and treatments.

To coordinate your dental care, your dentist will:

- Keep your dental records in one place to give you better service.
- Provide access for you to dental care 24 hours a day, 7 days a week.
- Be your first contact when you need dental care, except in an emergency.
- Arrange for specialty dental care, if you need it.

Fee-for-service

Fee-for-service (FFS) means that you are not enrolled in a managed care plan. If you are not enrolled in managed care, you can receive health care from any provider who will take your Medical Care ID. You may need to call doctors' offices to find out if they accept

OHP clients. That provider will bill DMAP directly for any services provided and will receive a "fee" for his or her "service." Some people call this an "open card."

If you are a fee-for-service client, your coverage letter will not show an OHP managed care plan. However, if you have private insurance, that insurance will be listed.
